

To Whom This May Concern,

1/19/2018

I am privileged to recommend AAA OSHA Training and Safety Consultants, Inc. as Safety Training and Consultant firm.

AAA Safety Consultants and I worked together on the NIST – ESPC– 7.9 MW CHP Addition and Chiller Replacement at NIST – Gaithersburg Campus this past year. AAA Safety Consultants has provided their professional services and which has raised the bar in a 100% safe and friendly work environment.

My time working with AAA Safety Consultants has been an extremely professional and satisfying time. AAA Safety became an irreplaceable part of the team. They have provided their expertise with executing safe work plans on numerous occasions to assist with the multiple trades. They have an impressive ability to plan, lead, communicate, and instruct occupational and construction safety in a team with multiple trades personnel, project managers, QA/QC professionals, and client representatives. They are driven to achieve the best value for their clients.

AAA Safety's knowledge of occupational and construction safety in EM-385 and OSHA within private and federal government facilities and industrial environments far exceeds the industry norms. Their knowledge of all the utilities associated with manufacturing facilities along with the industrial facilities has proved to be an asset on all projects. They use and put all of their skillsets within these environments to train and protect all personnel onsite. A few examples of the many activities that they have provided unsurpassed excellence with, crane lift plans, fall protection, reviewing activity hazardous analysis (AHA), reviewing and advising on contractor safety plans, high-voltage work plans, and trench safety. They performed daily safety inspections, lead safety briefings at the preparatory meetings, and kept and maintained the onsite safety records, while engaging the workers to assist in the safety of others.

Please feel free to contact me at 865-441-5751 if you have any questions regarding the expertise that AAA Safety Consultants can and will bring to any project.

Sincerely,

A handwritten signature in black ink that reads "Charles E. Campbell II".
